

VIRTUAL ONSITE EDUCATION

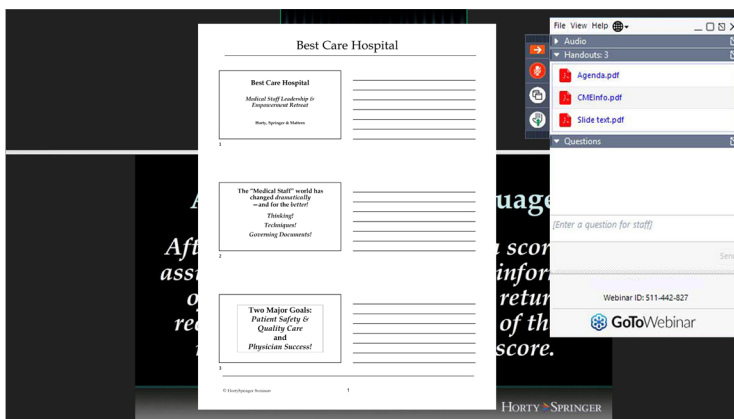

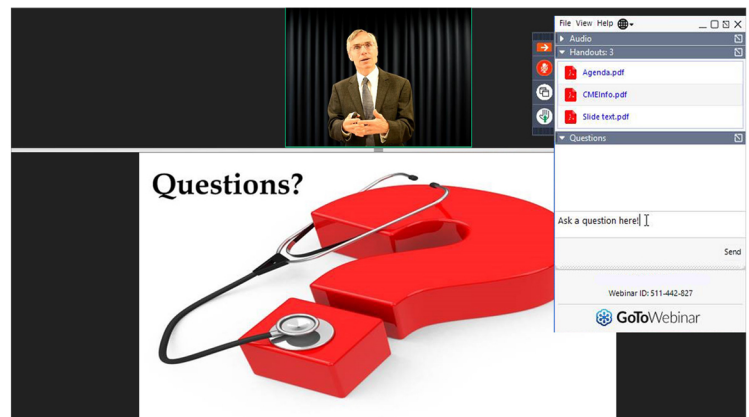

Information, challenges and legal concerns are shifting daily during the pandemic, impacting how hospitals and their staffs operate today and how they plan for the future. Now more than ever, consistent education is key.

HortySpringer's mission during this time is to help hospitals and organizations by continuing to provide our high-quality, cost-effective educational offerings, regardless of travel restrictions. To that end, we are pleased to offer virtual onsite educational training that will enable you and your staff to continue receiving the guidance you need and have come to trust from our experienced attorneys. Our process is simple – you will receive a link to join your session through GotoWebinar or GotoMeeting. All you need is an internet connection. We'll take care of the rest! CME credit is available upon request, for an additional fee.
